

BE YOUR OWN LIGHT

About Dr. Susan Jamieson

Known around the world as The Light Doctor, Dr. Susan is an award-winning Scottish physician who specializes in bridging science and consciousness. Her background is of a practicing physician, and an expert in cutting-edge Integrative (East-West) Medicine. Based in Hong Kong for 25 years, practicing many forms of Energy Medicine, she is lucky enough to be a doctor to many rock stars including Sr. Elton John and Green Day.

Having established connections between western and complementary medicine, she now teaches intuition and how to expand our own connection with consciousness. This leads us, firstly, into knowing who we are, then becoming more of who we are; and finally becoming everything that we are capable of being.

Connection to your innate light heritage leads you to heal through accessing huge inner resources, maximizing your potential, also connecting to your inner GPS. Whether a course on 'Wellbeing through connecting to the light of nature; or 'Intuiting your way to wellbeing', you'll learn the tools to connect to your inner light (and resources).

Susan is recipient of awards for her charity work, an inspirational speaker, recently on TEDx and hosting her own radio show. Her book 'Medical to Mystical, Bring Light into your Life' (Findhorn Press) describes her own journey to the LIGHT and leads the reader to their own discovery through simple exercises.

Quote From Dr Sue

"To me, light is everything. It's that all-pervading ground substance of the Universe; it's the energy of love; it's the light of God; it's the primordial mass from which we arose and it's that which connects us all in its shimmering web. It's my mission to help people understand the practical and fundamental concepts behind these ideas, so they can absorb, hold and share as much light as possible in this world in preparation for the next stage in human evolution."

About Dr Sue

I love Medical to Mystical. Dr. Susan Jamieson's insights into role of light in healing are both profound and rare in today's medicalized, technological world. Her knowledge is based in solid science, much of which has been neglected in conventional medicine. She possesses the wisdom of healers throughout history — that mind and body are a whole, and that consciousness is a vital factor in health."

~ Larry Dossey, MD
